23 GEND

23.1 GEND: GEND_GBV

GEND_GBV: Number of people receiving post-gender-based violence (GBV) clinical care based on the minimum package.

	C	D	E
Column Name			
UID	GEND_GBV.PE.T_1	GEND_GBV.S.T_1	GEND_GBV.PE.Growth.T
Column Type?	past	past	assumption
What type of data?	integer	integer	percentage
Prepopulated data?	Y	Y	N
Enter or modify data?	?	?	N
Calculated column?	N	N	Y
Linked column?	Y	Y	Y

	F	G	H
Column Name			
UID	GEND_GBV.S.Growth.T	GEND_GBV.PE.T	GEND_GBV.S.T
Column Type?	assumption	target	target
What type of data?	percentage	integer	integer
Prepopulated data?	N	N	N
Enter or modify data?	N	N	Y
Calculated column?	Y	Y	Y
Linked column?	Y	Y	Y

23.1.1 DATIM Import

The following data points will be imported into DATIM from this section:

- **Physical/Emotional Violence (FY25)** $GEND\_GBV.PE.T$

- **Sexual Violence (FY25)** $GEND\_GBV.S.T$

23.1.2 Instructions

1. For historical context, review FY23 targets for both the Physical/Emotional Violence and Sexual Violence service types, which are pre-populated from DATIM.

2. Review and adjust the "Projected change in GEND_GBV - Physical/Emotional Violence services (%)" and "Projected change in GEND_GBV - Sexual Violence services (%)" columns. These will default to 0%, though this reflects no suggested strategic direction.

3. Review FY25 targets for both the "Physical/Emotional Violence" and "Sexual Violence" service types. Each of these is calculated as a function of the expected change rate multiplied by the FY24 target for the related service type. In the case services are planned in FY25 where these were not provided in FY24, you may manually enter FY25 targets in these columns.
